

# Honing Guide

HG-4

- The new HG-4 Honing Guide has been widened to accept irons up to 70mm (2.75") in width which covers most available irons and chisels.

- T-Square for blade squareness
- Use the set up gauge for consistent angles at 20°, 25°, 30° and 35°, three of the fixed references have cutouts to eliminate interference with the clamping pad.

- The pivot clamping bridge will accommodate aggressively tapered tools, such as Japanese chisels.
- Moving the clamping bridge forward to more readily accept spokeshave irons.
- A hard stops to the lead screw to prevent crashing the brass roller into the lead screw.
- Anodized aluminum axle do not react with wet brass.
- Quickly fine tune the blade angle or micro bevel with the rear adjustment knob.

## ■ Specification

Setup Gage Dimensions	172 x 38 x 24 mm	6-3/4" x 1-1/2" x 15/16"
Setup Gauge Reference Angles	20°、 25°、 30°、 35°	20°、 25°、 30°、 35°
Maximum Iron Width	63 mm	2-1/2"
Maximum Iron Thickness	12.5 mm	1/2"
